🐙 Jayasimha-2005

Career Objective

Computer Science undergraduate with hands-on experience in mobile application frontend development and full-stack web development. Seeking an internship to apply programming fundamentals, problem-solving skills, and practical development experience in building reliable and scalable software systems.

Education

Rajiv Gandhi University of Knowledge Technologies, RK Valley

B.Tech in Computer Science and Engineering

Aug 2023 - present

CGPA: 9.14 / 10

RGUKT RK Valley – Pre-University Program

MPC

2021 - 2023

CGPA: 9.92 / 10

PROJECTS

LifeBand Maa | AI & HealthTech Mobile Application

Nov 2025 - Present

Role: Frontend Designer (React Native)

- Designed and developed the frontend of a React Native mobile application for maternal health monitoring.
- Built intuitive user interfaces for real-time health alerts and emergency notifications.
- Collaborated on system architecture and data flow to support AI-driven early risk detection.
- The project was shortlisted/recognized at PitchTank, Hack the Flame, Techzite, and EVEREST Engineering, highlighting strong real-world healthcare impact and innovation.

Smart School | Full-Stack Developer

Jun 2025 - Aug 2025

Tech Stack: React.js, Node.js, MySQL

- Built a role-based school management system for Admin, Teacher, and Parent access.
- Automated attendance and daily student updates, reducing teacher manual workload by approximately 40%.
- Developed a Progressive Web App (PWA) with offline support and installable features.

Project-S (SmartStudy) | Developer

Mar 2025 - Apr 2025

Tech Stack: HTML, CSS, JavaScript

- Developed an academic assistant platform used by 50+ students.
- Implemented progress tracking, to-do lists, timetables, notes, and educational modules.
- Built a mobile-responsive and performance-optimized user interface.

Skills

Languages: Java, Python, C, JavaScript, SQL, HTML, CSS

Frameworks, Libraries & Tools: React.js, React Native, Node.js, Express.js, MongoDB, Firebase, Pandas, NumPy, Git, GitHub, Postman, Render, Visual Studio Code

Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork, Time Management

Achievements

• First Place – Hack the Flame Hackathon

Recognized for developing an innovative, real-world solution under competitive time constraints.

• First Place – Techzite 2K25 (IoT Category)

Awarded for designing and presenting an impactful IoT-based engineering solution.

• Top 10 Engineering Teams – EVEREST Engineering

Selected among the top 10 teams for technical innovation, execution quality, and problem-solving approach.

• Finalist – ACEI's Aravind Hackathon

Shortlisted for presenting a scalable and socially relevant technology solution.

• Project Recognitions – LifeBand Maa

Project shortlisted/recognized at PitchTank, Hack the Flame, Techzite, and EVEREST Engineering for healthcare impact and innovation.
