

JAYASIMHA PADIGERI

Full-Stack Developer | AI-Integrated Web & Mobile Apps

Dharmavaram, Andhra Pradesh, India | padigerijaya@gmail.com | +91 9652163415 | [LinkedIn](#) | [GitHub](#)

Full-stack developer with hands-on experience building and deploying scalable web and mobile applications using the MERN stack and React Native. Strong focus on clean architecture, performance optimization, and real-world usability. Experienced in designing secure, role-based systems and implementing data-driven features in production environments.

Actively building expertise in AI/ML by working on data preprocessing, feature engineering, and integrating intelligent components into full-stack applications. Interested in applying machine learning to enhance automation, real-time decision-making, and user-centric product experiences.

PROJECTS

LifeBand Maa

Nov 2025 – Present

Startup | AI + HealthTech

- Designed and developed the React Native frontend for a maternal health monitoring application.
- Built real-time health alert interfaces and emergency notification workflows.
- Designed data flows to support AI-driven early risk detection using maternal health metrics.
- Integrated AI-generated insights into the frontend to enable timely alerts and decision support.

Aravind Eye Care eLogbook App

02 Jan 2026 – 05 Jan 2026

Mobile Application

- Developed a clinical eLogbook application for ophthalmology workflows including structured case entry, reviews, and analytics.
- Implemented secure authentication with role-based access for Residents, Fellows, Consultants, and Reviewers.
- Designed compliance-ready data capture using cloud storage and structured digital forms.

Smart School

Jun 2025 – Aug 2025

Full-Stack Web Platform | [Live Demo](#)

- Built a role-based school management system for Admin, Teacher, and Parent access.
- Automated attendance and daily student updates, reducing manual workload by approximately 40%.
- Developed as a Progressive Web App (PWA) with offline support and installable features.

Project-S (SmartStudy)

Mar 2025 – Apr 2025

Academic Assistant Platform | [Live Demo](#)

- Developed an academic productivity platform used by 50+ students to manage daily academic workflows.
- Implemented progress tracking, to-do lists, timetables, notes, and centralized academic resources.
- Designed a clean, responsive UI to reduce cognitive load and improve usability.
- Optimized client-side performance and state management for a smooth user experience.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies (RGUKT), RK Valley

Kadapa, Andhra Pradesh

Bachelor of Technology in Computer Science and Engineering

Aug 2023 – Present

CGPA: 9.14 / 10

Pre-University Program (MPC)

2021 – 2023

CGPA: 9.92 / 10

SKILLS

Programming Languages: Java, Python, C, JavaScript, SQL

Frontend: HTML, CSS, React.js, React Native

Backend: Node.js, Express.js

Databases: MySQL, Firebase

Data & AI: Pandas, NumPy, Data Preprocessing, Feature Engineering, ML Integration

Tools: Git, GitHub, Postman, Render, Visual Studio Code

ACHIEVEMENTS

Hack The Flame Hackathon Winner

Won 1st Place at a national-level hackathon held in Mumbai, conducted by Ignite Rooms; recognized for innovation and end-to-end execution.

Techzite 2.0 Hackathon Winner

Won 1st Place at TECHZITE 2.0 in Nuzvid, competing against teams from multiple colleges; recognized for high-impact innovation.

Everest Engineering Hackathon

Placed in the Top 10 among 100+ teams; gained hands-on experience in rapid prototyping and iterative problem-solving.

Project Recognition – LifeBand Maa

Project shortlisted at PitchTank, Hack the Flame, Techzite, and EVEREST Engineering for health-care impact.
